

# » Clean Technology

## Who We Are:

An established Clean Technology practice which leverages RP International's 13 years of technology recruitment experience. We work closely with the industry at board level to deliver effective and collaborative recruitment solutions.

## Our Expertise:

- Regional offices across Europe, EMEA and APAC.
- Specialist consultants with technical background and industry expertise.
- Our specialist team has successfully delivered executive search, contingent approach and advertised selection for permanent, interim and contract engagements.
- Research-led approach through market analysis as well as building on a network established over a number of years working with clean technology professionals.
